Floyd's Triangle

Floyd's triangle, named after Rober Floyd, is a right angled triangle, which is made using natural numbers. It starts from 1 and consecutively selects the next greater number in sequence.

```
1
2 3
4 5 6
7 8 9 10
```

We shall here learn how to print floyd's triangle using C++ programming language.

Algorithm

Algorithm should look like this –

- Step 1 - Take number of rows to be printed, n.
- Step 2 - Make outer iteration I for n times to print rows
- Step 3 - Make inner iteration for J to I
- Step 3 - Print K
- Step 4 - Increment K
- Step 5 - Print *NEWLINE* character after each inner iteration
- Step 6 - Return
